

TURBOMIST EVAPORATOR

- Designed as an evaporator for industrial grade applications
- Comparing a snowmaker to our Turbomist is like comparing a Nissan pickup to an ore truck.
- Built to withstand pH levels from 2 to 11, stainless steel with 3M product, Scotchkote 134 finish
- Built to run 24/7/365 and at about 5 years do a motor rewind and run for another 5 years, weekly monitoring would be nice, we have had customers drain their pond by mistake, they worked better than expected.
- Three models to suit all needs, PLUS we custom what you want, you tell us what you need, we tell you, how much!
- Deal direct with the factory if you choose
- Volume discounts available
- Motors about as close to submersible as you can get them, designed to have over spray from other machines or blowback falling on them 24/7
- One year warranty
- 6-8 weeks delivery the norm
- Invoicing on approved credit with purchase order
- World wide installations in over 20 states in the USA, Canada, Australia, Russia, Jamaica, Bahamas, Bolivia, Chile and India.
- Mining, power generators, US Bureau of Reclamation, US Forestry- US Dept of Energy, State governments, landfills, distilleries, chemical plants, textile plants, produce water contractors NG
- Customer list available.
- Assistance in sizing and requirements based on location and volume
- SALTS ARE NOT A PROBLEM FOR THIS EQUIPMENT, salts create drift issues, which can be contained by netting around your pond.
- 7 out of 10 of our clients have high salt content, not a problem
- Scaling issues addressed with easy fix.
- High dissolved solids, no problem, customers report as high as 160,000 ppm
- You get what you pay for with durability and reliability, your capital costs amortized over 10 years will be cheaper than competitors that last 2-3 years
- Organizations like Barrick, Kinross, Queenstake, Newmont, Glamis, BHP, US Borax, Phelps Dodge, Solvay, Windalco, Southern California Gas, US Forestry and US Dept of Energy, Con Agra Foods and US Bureau of Reclamation do their due diligence before purchasing, and they all use Turbomist evaporators

This is an industrial evaporator, not a snowmaker

We are solutions people, not all applications are the same, talk to us!
